4.2 Default modifier

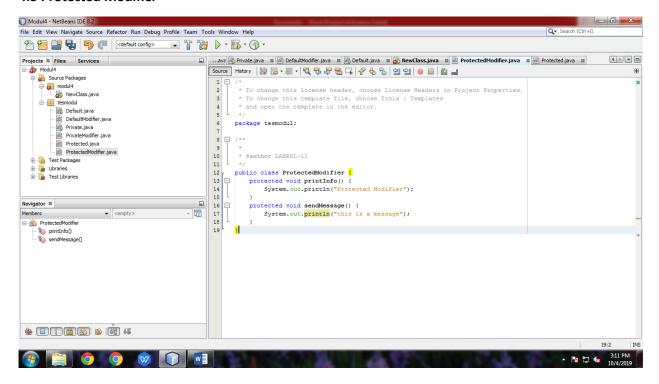

- 1. Akses dalam satu package
- > Bisa di akses karena class tersebut terdapat dalam package yang sama

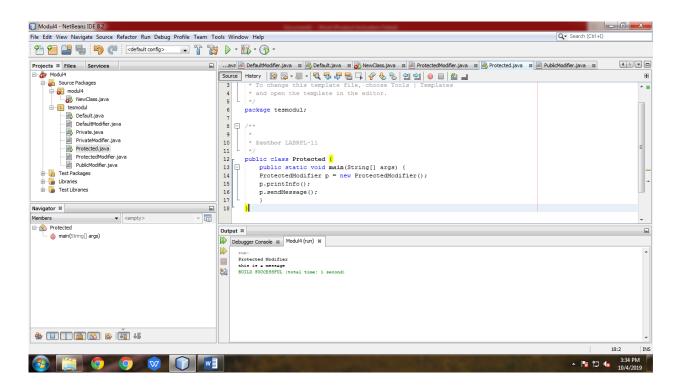

- 2. Mengakses dalam package yang lain
- Tidak bisa di akses karena method tersebut dalam package yang berbeda

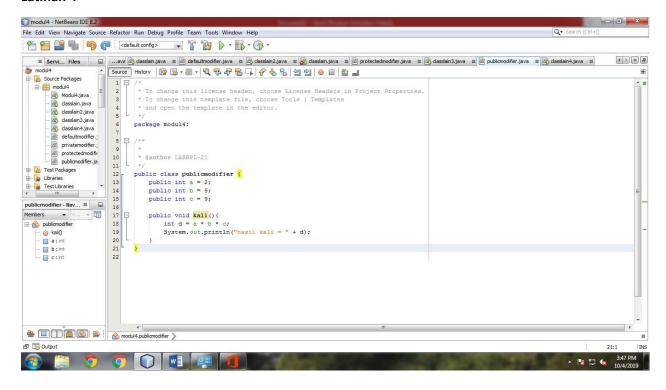

4.3 Protected Modifier

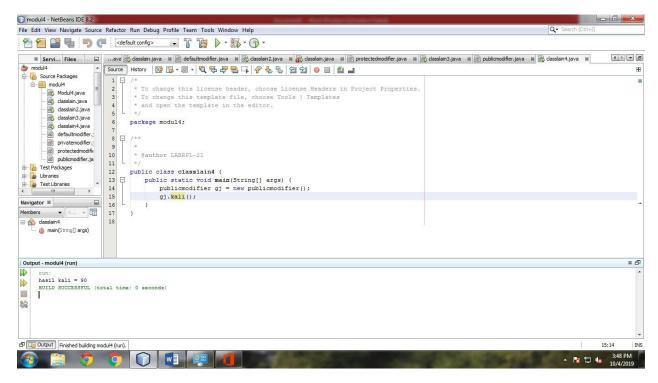

Bisa di akses dalam satu package yang sama

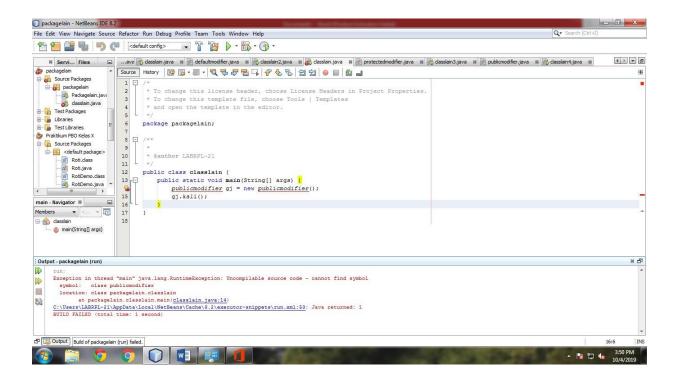

Latihan 4

- 1. Diakses dalam satu package
 - Bisa diakses karena didalam package yang sama

- 2. Akses dalam package lain
 - Tidak bisa diakses karena berada diluar package

4.4 Public Modifier
